

# Christmas Tree Stocking Instructions

1. Place **one side** of the stocking down on the table with the toe facing left. Making sure the stocking doesn't have any tracing marks visible.
2. Glue tree to stocking, using a few dots of glue, with the top of tree just less than three inches from top of stocking.
3. Double thread the needle-**do not knot**.
4. Separate the four earth-tone buttons from remaining buttons and set them aside to be used as base of tree. Place the yellow button (the "star") at the top of the tree. Sew the needle down through the button and the felt, then back up pulling thread through and leaving just enough thread on top to tie a knot. Tie a square knot.
5. Cut thread and repeat using all the buttons, spreading them out equally as ornaments on the tree.
6. Cut the knotted thread to equal lengths.
7. Sew on the four earth-tone buttons with a regular button stitch and single thread knotting the thread underneath.
8. Place stocking in zip lock bag.

Step 1

Steps 2-4

Steps 5-6

Step 7

*Attach needle to needle card and place in basket on table.*

*Please make sure all pins are removed.*

**Thank you for your service.**
