

Make your own

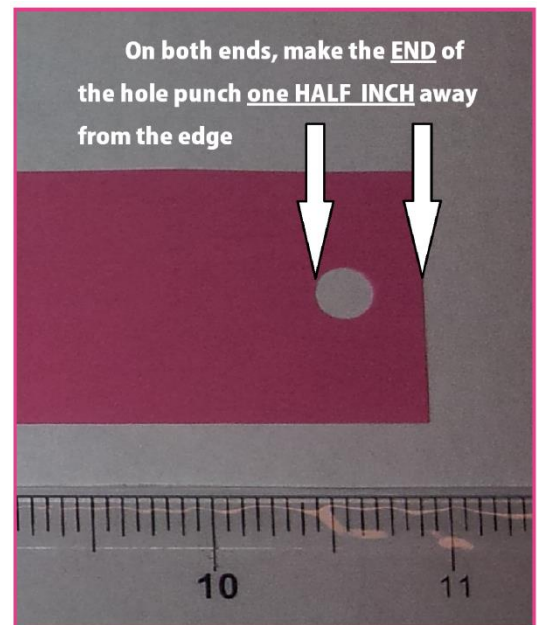

## Happy Pillow PIE PATTERN

You will need:

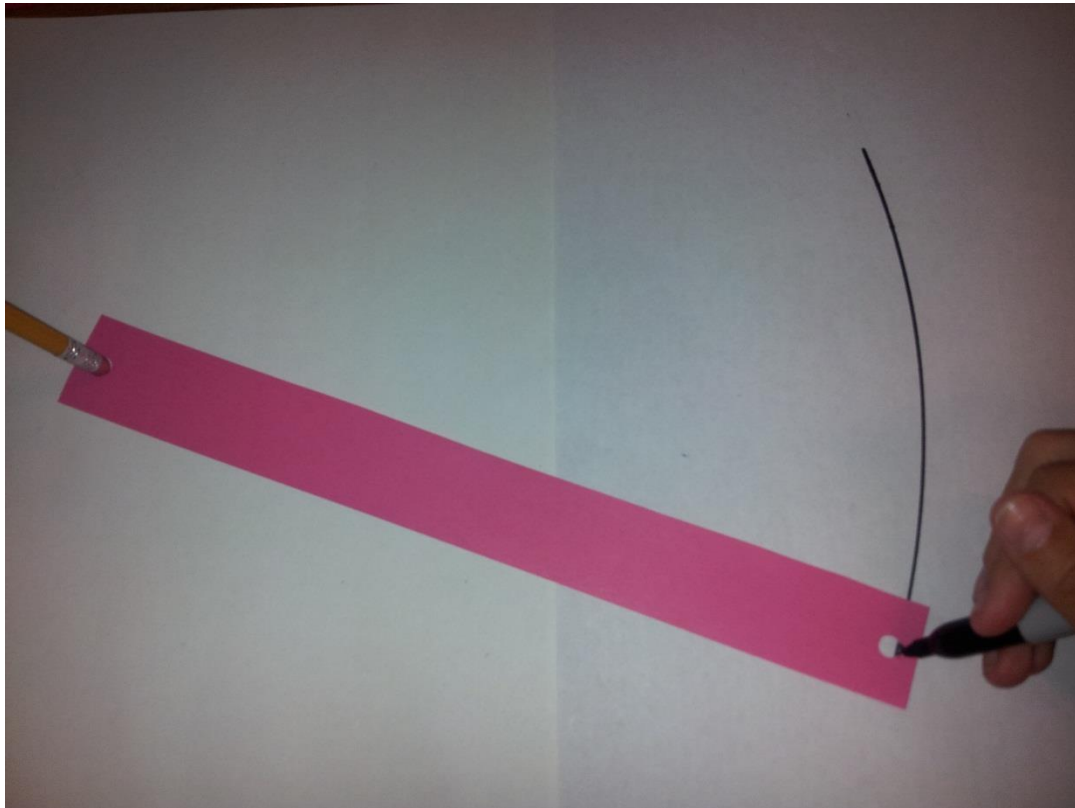

- Poster paper
- A standard size 8 ½ x 11” sheet of cardstock
- Hole-Punch
- Method of measuring (ruler)
- Pen

1: Take your cardstock and cut it long ways about an inch long.

2: Hole-punch both sides a half an inch away from both ends. Now this is your compass.

3: In the center of your poster paper, hold one end of your compass using your finger or a pencil, and put your pen in the other hole. You are now able to rotate around the center drawing a perfect circle. NOTE: Make sure not to move your center at all!

4: Cut out your circle. To mark your edges, go around the circle with a ruler and make a mark at every inch to make your cutting guidelines. You can now cut this in half or into a fourth to be your PIE PATTERN! NOTE: Do NOT use this full circle to create your 23" full circle. It is one inch too short in radius. If you want to make a template in this method to make your full pillow template, make your compass one inch longer.
