

Walker Bags

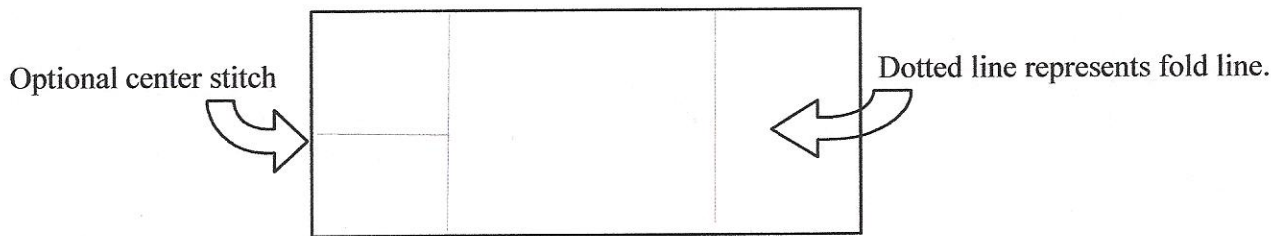

1. Cut 2 pieces of material 17" x 34". Place right sides together and sew together with a 1/4 inch seam, leaving an opening big enough to allow you to turn the bag right side out. Fold raw edges in and sew together by hand or machine.

2. Cut 2 strips of velcro at least 2 inches long. Place on back of bag, about 3 inches from the side and 8 inches from the short edge of bag. When pockets are created, velcro will be on the back of the bag, behind the pockets.

3. Create pockets on each end of bag by folding shorter end 6 inches towards the center. Sew short edges together to create pockets. You may also choose to add an optional center stitch in one of both larger pockets to create 2 smaller pockets.

4. Add embellishments such as yo-yo flowers, buttons, charms, etc., as desired.
