

Wheelchair Bags

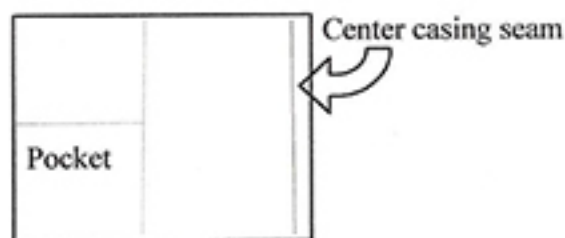

1. Cut 2 pieces of material 17" x 34". Place right sides together and sew together with a 1/4 inch seam, leaving an opening big enough to allow you to turn the bag right side out. Fold raw edges in and sew together by hand or machine.

2. Create pockets on each end of bag by folding shorter end 6 inches towards the center. Sew short edges together to create pockets. You may also choose to add an optional center stitch in one or both larger pockets to create 2 smaller pockets..

3. Create casing in center of bag by folding in half, pockets on the outside, and sew a 3/4 inch seam down center of bag.

4. Cut 3 feet of parachute cord and thread through casing, tying slip knots at each end. Add embellishments such as yo-yo flowers, buttons, charms, etc., as desired.
